Digital Library Services

Are You –

- ✓ An Educational Institution Planning to Store its Digital Assets?
- ✓ An Organization planning to create a Knowledge Management Culture?
- ✓ A Professional in need of an Efficient Document Management System?

## NEED FOR DIGITAL REPOSITORY

The Impact of Information Technology has brought about a transformation in the way Educational Institutions and Organizations work. As more and more documents were getting created in an E-Format, the need for safe storage, indexing and easy retrieval was being felt.

Some of the key requirements from any Digital Repository were:

- Support Mechanisms to Import, Export, Identify, Store and Retrieve Digital assets
- Can manage and preserve all types of Digital content
- Compatible with MARC 21 / MODS metadata formats
- Completely customizable User Interface

### Educational Institutions

Need an Institutional Repository to manage their Educational, Research and associated assets

Helps the institutions develop coherent and coordinated approaches to capture, identification, storage and retrieval of their intellectual assets.

Students and Academic staff can publish make their work available within and outside the institution

### Corporates

Need a Digital Repository to manage Knowledge Documents created by employees of the Organization

Helps the Organization to manage and easily retrieve documents created for future use

Employees can use Digital Library to use works of past employees and build on it

### Professionals

Consultants / Professionals needs to manage documents such as scanned drafts, drawings, designs

Helps Professionals store their critical documents and make that available for future use

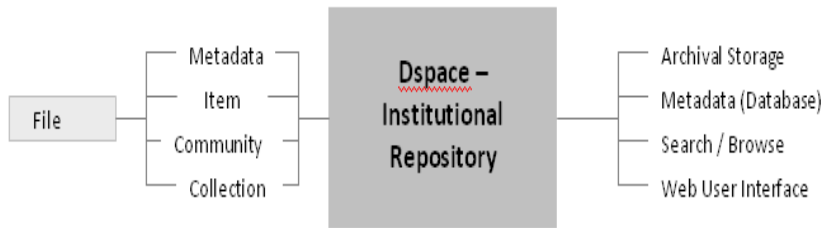

Professionals can share these documents with their clients and save time by scanning and printing them

## Dspace Submission Workflow

## DSPACE – AN OPEN SOURCE PLATFORM

Dspace is the software of choice for Academic, non-profit and commercial organizations building open digital repositories. It is free and easy to install “out of the box” and completely customizable to fit the needs of any organization.

Dspace preserves and enables easy and open access to all types of digital content including text, images, moving images, mpegs and data sets. And with an ever-growing community of developers, committed to continuously expanding and improving the software, each DSpace installation benefits from the next.

### Highlights

Developed by MIT and HP Labs to solve a typical problem faced by Universities

More than 600 Instances of DSpace have been installed worldwide in more than 70 different countries

Preferred Institutional Repository System Software in a survey conducted for Institutional Repositories in the United States

### Features

Free / Open Source Institutional Repository licensed under the BSD Open Source License

Compatible to standards such as MARC 21 and MODS and easily customizable metadata, follows the Dublin Core Metadata format

Can manage and preserve all types of digital content
